V/v Explaining fluctuations in production and business results in second quarter and the first 6 months of the year 2026 compared to the same period last year

To: Hanoi Stock Exchange

1. Name of organization: Cao Bang Cast Iron and Steel Joint Stock Company
2. Stock Code: CBI

Based on the production and business results of the fourth quarter in the financial statements for the accounting period ending June 30, 2026, Cao Bang Iron and Steel Joint Stock Company would like to explain the fluctuations in production and business results in the second quarter of 2026 compared to the same period last year as follows:

Unit: Million dong

Items	Second quarter		The first 6 months of the year		Fluctuation in the second quarter of 2026 compared to the same period last year	Fluctuation in the first 6 months of the year 2026 compared to the same period last year
	2026	2025	2026	2025		
1. Revenue from sales of goods and rendering of services	706,169	529,650	1,093,084	947,905	176,520	145,179
2. Cost of sales	642,876	610,316	1,047,332	1,050,997	32,560	(3,665)
3. Gross profit from sales of goods and rendering of services	63,294	(80,667)	45,752	(103,092)	143,960	148,844
4. Financial income	386	1,178	564	1,182	(792)	(618)
5. Financial expenses	12,042	16,027	22,878	26,478	(3,986)	(3,600)
6. Selling expenses	20,817	14,637	32,461	26,826	6,181	5,635
7. General and administrative expenses	5,639	22,198	10,289	28,147	(16,559)	(17,858)
8. Net operating profit	25,182	(132,350)	(19,312)	(183,360)	157,533	164,049
9. Other income	(119)	(2)	(393)	500	(117)	(893)
10. Total accounting profit before tax	25,063	(132,352)	(19,705)	(182,860)	157,416	163,156
11. Current corporate income tax expense	913	-	913	-	913	913
12. Net profit after corporate income tax	24,150	(132,352)	(20,618)	(182,860)	156,503	162,243

* Profit after tax for Q2/2026 increased by VND 156,503 million compared to the same period in 2025, reversing from a loss of VND 132,352 million in the previous year to a profit of VND 24,150 million, due to the following reasons:

- Net revenue from sales and services in Q2/2026 reached VND 706,169 million, an increase of VND 176,520 million (equivalent to a 33.3% increase) compared to the same period in 2025 (VND 529,650 million). The primary reason is that the selling price of steel billets in Q2/2026 rose by 10.4% year-on-year (from VND 12.19 million/ton in Q2/2025 to VND 13.47 million/ton in Q2/2026), and the sales volume of steel billets in Q2/2026 reached 50,677 tons, up 20.89% compared to the same period in 2025 (which was 41,918 tons).

- Steel billet production volume in Q2/2026 reached 46,576.1 tons*, an increase of 112% compared to the same period in 2025 (steel billet production volume in Q2/2025 was 21,951 tons).

- General and administrative (G&A) expenses in Q2/2026 decreased by VND 16,559 million compared to the same period in 2025.

- Financial expenses in Q2/2026 decreased by VND 3,968 million compared to the same period in 2025.

The above is the explanation from Cao Bang Cast Iron & Steel Joint Stock Company regarding the fluctuations in business performance for Q2/2026 compared to the same period last year.

Sincerely! 

Recipient: 

- As above;
- Department: Material planning (coordination);
- Archive: Archivist, Financial accounting.

NOTES TO FINANCIAL STATEMENTS

The second quarter 2026

1. CHARACTERISTICS OF BUSSINESS OPERATIONS

Form of Capital Ownership: Joint Stock Company

The Company's charter according to Bussiness Registration Certificate No. 4800162247 was first registered on October 18, 2006 issued by the Department of Planning and Investment of Cao Bang province, was amended for the 10th time on June 10, 2022.

The company's headquarters is located at No. 52, Kim Dong street, Thuc Phan ward, Cao Bang province.

The company's charter capital is VND 430,063,660,000.

Bussiness areas:

In the financial year 2026, the company's primary business areas include: surveying, exploration, and mining of iron ore; organizing the beneficiation and processing of various minerals; transportation and freight forwarding services; and mineral and metallurgical processing.

Bussiness activities:

The company's main activities include:

- Surveying, exploration, mining, beneficiation, processing, and trading of various minerals.
- Consulting on mine design, and investment advisory for mining, beneficiation, and mineral processing.
- Providing consultancy and technology transfer in geology, mining, and metallurgy.
- Designing, manufacturing, machining, repairing, and importing/exporting goods, materials, and equipment for mineral exploration, mining, processing, and metallurgy.
- Producing, trading, and exporting, importing steel, cast iron, and construction materials.
- Offering transportation and freight forwarding services.
- Engaging in other business sectors not prohibited by law.

2. ACCOUNTING REGIME AND POLICIES APPLIED AT THE COMPANY

2.1. Accounting period, accounting currency

The annual accounting period of the Company is from January 01 to December 31.

The currency used in accounting records is Vietnam dong ("VND").

2.2. Applicable accounting regime

The Company applies the Enterprise Accounting Regime issued under Circular 200/2014/TT-BTC dated December 22, 2014 of the Ministry of Finance.

The Company has applied Vietnamese Accounting Standards and documents guiding Vietnamese Accounting Standards. The financial statements are prepared and presented in accordance with the provisions of Vietnamese Accounting Standards and the Enterprise Accounting Regime issued in Circular 200/2014/TT-BTC dated December 22, 2014 of the Ministry of Finance.

2.3. Changes in accounting policies and disclosures

2.4. Basis for preparing the Company's Financial Statements

The Company's financial statements apply accounting policies that are consistent with those of the Corporation.

2.5. Financial instruments

Initial recognition

Financial assets

The company's financial assets include cash and cash equivalents, accounts receivable from customers and other receivables, loans, and short-term and long-term investments. At the time of initial recognition, financial assets are determined based on the purchase price/issuance cost plus any other costs directly related to the purchase or issuance of the financial asset.

Financial resources

The company's financial liabilities include loans, accounts payable to suppliers and other payables, and accrued expenses. At the time of initial recognition, financial liabilities are determined based on the issuance price plus any costs directly related to the issuance of the financial liability.

Value after initial recognition

Currently, there are no specific regulations regarding the revaluation of financial instruments after initial recognition.

2.6. Foreign currency transactions

Transactions in foreign currency during the financial year are converted into Vietnam dong at the actual exchange rate on the transaction date.

The actual exchange rate is determined based on the following principles:

When buying or selling foreign currency: It is the exchange rate specified in the foreign exchange purchase or sale contract between the company and the commercial bank;

When contributing or receiving capital: It is the buying exchange rate of the bank where the company opens the account to receive capital from investors on the capital contribution date;

When recognizing receivables: It is the buying exchange rate of the commercial bank where the company designates customers to make payments at the time of the transaction;

When recognizing payables: It is the selling exchange rate of the commercial bank where the company expects to carry out transactions at the time of the transaction;

When purchasing assets or making immediate payments in foreign currency: It is the buying exchange rate of the commercial bank where the company makes the payment.

The actual exchange rate when revaluing foreign currency-denominated monetary items at the time of preparing the consolidated financial statements is determined based on the following principles:

When preparing Financial Statements, the Company must re-evaluate foreign currency monetary balances using the buying rate for assets and the selling rate for liabilities at the commercial bank where the enterprise frequently transacts at the reporting date.

All exchange rate differences arising during the year and those arising from the revaluation of foreign currency-denominated monetary items at year-end are recorded in the business results for the financial year.

2.7. Recognition of cash and cash equivalents

Cash includes cash on hand, demand deposits in banks, and monetary gold used for value storage purposes. It does not include gold classified as inventory, which is used as raw material for product production or goods for sale.

Cash equivalents are short-term investments with a maturity of no more than 3 months from the date of investment, high liquidity, easily convertible into a known amount of cash, and with minimal risk in converting to cash.

2.8. Recognition of financial investment

Investments held until maturity include: term deposits in banks (including promissory notes, bills of exchange), bonds, preferred stocks with mandatory buyback by the issuer at a specified time in the future, loans, ... and other investments held until maturity with the purpose of earning regular interest and other similar investments held until maturity.

Investments in joint ventures and associates are initially recognized in the accounting books at cost. After initial recognition, the value of these investments presented in the financial statements is determined by cost less any provision for impairment (if any).

Investments in equity instruments of other entities, including investments in equity instruments of entities over which the investor does not have control, joint control, or significant influence, are initially recognized at cost. After initial recognition, the value of these investments is determined by cost less any provision for impairment (if any).

Dividends received in the form of additional shares are only recorded as the number of shares received and do not result in an increase in the investment value or financial revenue.

2.9. Recognition of receivables

Receivables are monitored in detail according to the aging of receivables, the debtor, the type of foreign currency receivable, and other factors based on the company's management needs.

2.10. Recognition of inventories

Inventories are initially recognized at cost, which includes purchase costs, processing costs, and other directly related costs incurred to bring the inventory to its location and condition at the time of initial recognition. After initial recognition, at the time of preparing the financial statements, if the net realizable value of the inventory is lower than its cost, the inventory is recognized at its net realizable value.

The value of inventory is determined using the weighted average cost method.

Inventory is recorded under the perpetual inventory system.

For determining the value of work-in-progress at the end of the period:

The value of work-in-process is accumulated based on actual expenses incurred for each type of unfinished product, and are determined based on direct material costs and direct labor costs.

2.11. Recognition of fixed assets, financial leased fixed assets

Tangible fixed assets and intangible fixed assets are initially recognized at cost. During their usage, tangible fixed assets and intangible fixed assets are recorded at their original cost, accumulated depreciation, and their remaining value. Depreciation is calculated using the straight-line method.

Finance leased fixed assets are initially recognized at fair value or the present value of the minimum lease payments (if the fair value is higher than the present value of the minimum lease payments), plus any directly attributable initial costs related to the finance lease (excluding VAT). During usage, the finance leased fixed assets are recorded at their original cost, accumulated depreciation, and remaining value. Depreciation of finance leased fixed assets is calculated based on the lease term as specified in the contract and is included in production and business expenses to ensure full capital recovery. Depreciation of fixed assets is calculated using the straight-line method.

Depreciation of financial fixed assets is calculated using the straight-line method.

2.12. Recognition of prepaid expenses

Expenses incurred in relation to the results of production and business activities of many accounting periods are recorded as prepaid expenses to be gradually allocated to the results of production and business activities in the following accounting periods.

The calculation and allocation of long-term prepaid expenses into production and business expenses in each accounting period is based on the nature and level of each type of expense to select a reasonable allocation method and criteria. Prepaid expenses are gradually allocated to production and business expenses using the straight-line method.

2.13. Recognition of payables

Payables are monitored in detail according to the aging of payables, the debtor, the type of foreign currency payable, and other factors based on the company's management needs.

2.14. Recognition of borrowings and finance lease liabilities

The value of financial lease liabilities is the total payable amount, calculated as the present value of the minimum lease payments or the fair value of the leased asset.

Loans and financial lease liabilities are tracked by each lender, each loan agreement, and the repayment term of the loans and financial lease liabilities. In cases of loans and liabilities denominated in foreign currencies, detailed tracking is conducted in the original currency.

2.15. Recognition of borrowing expenses

Borrowing expenses are recognized as production and business expenses in the period they are incurred, except for borrowing expenses directly related to the investment in construction or production of an unfinished asset, which are included in the value of that asset (capitalized) when meeting all the conditions specified in Vietnamese Accounting Standard No. 16 "Borrowing expenses". In addition, for a separate loan for the construction of fixed assets, investment real estate, interest is capitalized even when the construction period is less than 12 months.

For general borrowings, partially used for the investment, construction, or production of an unfinished asset, the amount of borrowing expenses eligible for capitalization in each annual accounting period is determined according to the capitalization rate for the average cumulative weighted costs incurred for the investment in construction or production of that asset. The capitalization rate is calculated as the weighted average interest rate of the outstanding borrowings during the year, excluding specific borrowings serving the purpose of obtaining a qualifying asset.

2.16. Recognition of accrued expenses

Payables for goods and services received from suppliers or provided to customers during the reporting period but not actually paid and other payables such as:

Payables for goods and services received from sellers or provided to buyers during the reporting period but not actually paid and other payables such as: vacation wages, costs incurred during seasonal production halts, interest expenses payable... are recognized as production and business expenses in the reporting period.

The recognition of accrued expenses in production and business costs for the year is carried out based on the principle of matching revenue and expenses incurred during the same period. These accrued expenses will be settled against the actual costs incurred. Any differences between the accrued amounts and the actual costs will be reversed.

2.17. Recognition of provisions for payables

Provisions payable are recognized only when the following conditions are satisfied:

The Company has a present obligation (legal or constructive) as a result of a past event;

It is probable that an outflow of economic benefits will be required to settle the obligation;

A reliable estimate can be made of the amount of the obligation.

The recognized value of a provision payable is the best reasonable estimate of the expenditure required to settle the present obligation at the financial year-end date.

Only expenses related to the initially established provision payable may be offset by that provision.

Provisions payable are recorded as production and business expenses for the financial year. The difference between the unused provision established in the previous fiscal year and the provision established in the reporting year is reversed and recorded as a reduction in production and business expenses in the year, except for the larger difference of the provision for construction warranty payable which is reversed and recorded as other income in the year.

2.18. Recognition of owners' equity

The investment capital reflects the actual amount of investment by owners.

Other capital under Owner's Equity reflects the business capital formed by supplementing from business results or by being donated, presented, sponsored, or revaluation of assets (if allowed to record an increase or decrease in Owner's investment capital).

Differences in asset revaluation are reflected in the following cases: when there is a State decision on asset revaluation, when equitizing State-owned enterprises, and other cases as prescribed by law.

Undistributed post-tax profits reflect the business results (profits or losses) after corporate income tax and the status of profit distribution or loss handling of the Company. Profit distribution is performed when the undistributed post-tax profits do not exceed the post-tax profits as shown on the financial statements, excluding the effects of gains recognized from bargain purchase transactions. In cases where dividends or profits are distributed to owners in excess of the undistributed post-tax profits, the excess amount is treated as a reduction in contributed capital. Dividends payable to shareholders are recognized as liabilities on the company's balance sheet after the Board of Directors issues a dividend distribution announcement.

2.19. Recognition of revenue

Revenue from sales

Revenue from sales is recognized when all of the following conditions are simultaneously satisfied:

Most of the risks and rewards associated with ownership of the goods or products have been transferred to the buyer;

The Company no longer retains management control or ownership rights over the goods;

Revenue can be measured reliably;

The Company has received or will receive economic benefits from the sales transaction;

The costs related to the sales transaction can be determined.

Revenue from service provision

Revenue from service provision is recognized when the outcome of the transaction can be reliably determined. For services provided over multiple years, revenue is recognized annually based on the completed portion of the service as of the balance sheet date for that year. The outcome of the service transaction is determined when the following conditions are met:

Revenue can be measured reliably;

It is probable that the economic benefits associated with the service transaction will be received;

The portion of the service completed as of the balance sheet date can be determined;

The costs incurred for the transaction and the costs to complete the transaction can be reliably estimated.

The portion of service provided is determined using the work completion evaluation method.

Financial income

Revenue generated from interest, royalties, dividends, profit shares, and other financial activities is recognized when the following two (2) conditions are met:

It is probable that the economic benefits associated with the transaction will be received;

Revenue can be measured reliably.

Dividends and profit shares are recognized when the Company becomes entitled to receive the dividends or profit shares from its investment.

2.20. Recognition of financial expenses

Expenses recognized under financial expenses include:

Costs or losses related to financial investment activities;

Borrowing costs;

Losses from the liquidation or transfer of short-term securities, and transaction costs associated with the sale of securities;

Provisions for the devaluation of trading securities, provisions for investment losses in other entities, losses incurred from foreign currency sales, and foreign exchange rate losses...

These expenses are recorded at their total amounts incurred during the year and are not offset against financial income.

2.21. Corporate income tax

a) Current corporate income tax expenses and Deferred corporate income tax expenses.

Current corporate income tax expense is determined on the basis of taxable income in the year and corporate income tax rate in the current fiscal year.

Deferred corporate income tax expense is determined on the basis of deductible temporary differences, taxable temporary differences and corporate income tax rates.

Do not offset current corporate income tax expense against deferred corporate income tax expense.

b) Tax Incentives

The Company is entitled to a Corporate Income Tax (CIT) rate of 10% for a period of 15 years regarding taxable income derived from the Cao Bang Iron and Steel Complex Investment Project. The Company is granted a CIT exemption for 04 years starting from the first year of earning taxable income (from 2017 to 2020) and a 50% reduction in tax payable for the following 09 years (from 2021 to 2029).

2.22. Related parties

Parties are considered related if one party has the ability to control or has significant influence over the other party's decision-making regarding financial policies and operations. The related parties of the Company include:

Enterprises, directly or indirectly through one or more intermediaries, that have control over the Company, are controlled by the Company, or are jointly controlled with the Company, including parent companies, subsidiaries, and associates;

Individuals, directly or indirectly holding significant voting power in the Company, or having significant influence over the Company, key management personnel of the Company, and close family members of these individuals;

Enterprises controlled, directly or indirectly, by these individuals holding significant voting rights or having significant influence over the Company.

When considering relationships with related parties for the preparation and presentation of the financial statements, the Company focuses more on the nature of the relationship than its legal form.
